

AKASH KUMAR PRADHAN

Backend Engineer || *JavaDeveloper* || *SpringBoot*

+91-6264409094 akashpradhan8335@gmail.com [LinkedIn](#) [GitHub](#) [LeetCode](#)

EDUCATION

Jain University, Bangalore

*M.Sc - Computer Science and Information Technology Engineering - **SGPA - 8.6***

2024 – 2026
Bangalore, Karnataka

SRM Institute Of Science And Technology, Chennai

*B.Tech - Mechanical Engineering - **CGPA - 7.8***

2019 – 2023
Chennai, Tamil Nadu

EXPERIENCE

OneFin - Backend Developer Intern

Jan 2026 – Present

- Developed and maintained backend modules for a Loan Origination System using **Python**, **Django**, and **PostgreSQL**, building scalable financial workflows.
- Worked on **OneCRM**, a partner-facing CRM platform for lead creation, validation, document management, and credit processing before loan booking in the LOS.
- Designed and created core database tables such as **CRMProfile**, **CRMLead**, and **CRMActivity** using Django ORM with validations, constraints, and workflow-based status handling.
- Developed an executor called **CREATE_LOAN_FROM_CRM_LEAD** to convert validated CRM leads into loan applications by creating profiles, loan requests, and related mappings.
- Implemented strong input validation, business rule enforcement, integration testing, and backend workflow handling to ensure reliable end-to-end functionality.
- Worked with Git, GitHub Actions, and CI/CD pipelines, and also contributed to **SchemaShield** for schema validation and secure structured data handling.

PROJECTS

FinFlow – Payment & Billing System | Java, Spring Boot, Microservices, MySQL

2024 – 2025

- Designed and developed a fintech microservice-based platform with User, Wallet, Billing, and Payment services using Spring Boot and RESTful APIs.
- Developed automatic and manual bill generation modules with bill validation, and status updates.
- Ensured transactional consistency by synchronizing wallet balance deduction, bill status updates, and payment records across services using reliable inter-service communication.
- Integrated WebClient for secure, synchronous inter-service communication between wallet, billing, and payment services.
- Configured API Gateway, Eureka Service Registry, and Zipkin for centralized routing, service discovery, and distributed tracing.

FoodIQ Application | Java, Android Studio, Spring Boot, Firebase, REST API

2024 – 2025

- Developed an Android app (Java) for users to see restaurant food items and view nutritional details (calories and ingredients) .
- Built a web portal (React + Spring Boot) for restaurant owners to register and manage their menus, including dish details, images, and nutritional data.
- Integrated Firebase for user authentication and real-time data storage, ensuring secure access and synchronized food databases.
- Designed REST APIs (Spring Boot + MySQL) to handle food data retrieval, updates, and restaurant registrations efficiently.

TECHNICAL SKILLS

- Programming Languages:** Java, Python, SQL, javascript, Machine Learning
- Backend Development:** Spring Boot, Spring Framework, REST APIs, Microservices, Spring MVC
- Frontend Development:** HTML5, CSS3, Bootstrap
- Mobile Development:** Android Development (Android Studio)
- Databases:** MySQL, PostgreSQL, Firebase, SQL, NoSQL
- Tools & Platforms:** Git, GitHub, CI/CD, Postman, Docker, ChatGPT, GitHub Copilot
- Developer Tools:** IntelliJ IDEA, VS Code, Eclipse
- Computer Science Fundamentals:** Data Structures & Algorithms, OOPs, DBMS, Operating Systems, Computer Networks
