SUMMARY

Data Analytics and Machine Learning practitioner skilled in transforming raw data into actionable insights through BI quality assurance, data visualization, and applied NLP/ML. Proficient in Python, SQL, Power BI, Tableau, and Databricks, with hands-on experience building explainable ML pipelines and supporting data-quality workflows in an Agentic AI product environment.

EDUCATION

Jain University, Bengaluru

2004 - 2026

M.Sc., Computer Science & Information Technology

Rajasthan University, Jaipur

Bachelor of Computer Applications

WORK EXPERIENCE

Data & Insights Intern — Skypoint

Apr 2026 – Present

Agentic AI products for healthcare and senior-living organizations

- Perform daily quality assurance on Power BI dashboards and operational reports for healthcare and senior-living clients, validating data accuracy and visualization consistency before client delivery.
- Execute pre-built validation scripts in Databricks and run end-to-end report verification workflows, cross-checking outputs against source data to ensure reporting reliability.
- Review Power BI visualizations to flag inconsistencies and support downstream BI workflows across Revenue Cycle Management, Workforce Management, and Operations & Compliance modules.
- Validate daily business and operational reports generated from healthcare and senior-living workflows, contributing to data integrity at the BI layer within an Agentic AI product environment.

SKILLS

Languages: Python, SQL, Java, PHP, C/C++, R

AI & ML: Deep Learning, NLP, Transformers, PyTorch, EDA

Data Analytics & BI: Power BI, Tableau, DAX, Pandas, NumPy, Matplotlib, Seaborn

Data Mgmt & QA: MySQL, ETL, Data Cleaning, Data Modeling, Data Quality Assurance

Cloud & Platforms: Databricks, Azure (fundamentals)

Tools: Jupyter Notebook, Git/GitHub, Claude

Soft Skills: Problem-Solving, Analytical Thinking, Teamwork, Research, Communication

PROJECTS

Intelligent Ticket Auto-Routing System (ITARS) ([LINK](#))

Tech: Python, Sentence-BERT, FAISS, XGBoost, Scikit-learn, Gradio

- Designed an end-to-end ticket auto-routing system integrating multi-label intent classification, semantic similarity-based duplicate detection, and confidence-aware hybrid routing.
- Engineered a hybrid duplicate-detection engine combining SBERT cosine similarity, TF-IDF lexical overlap, cross-encoder scoring, and tag Jaccard similarity, accelerated via FAISS.
- Trained an SBERT + XGBoost multi-label classifier across 28 routing intents with isotonic calibration, reaching Micro F1 of 0.7747.
- Achieved 98.21% duplicate precision, 84.3% routing accuracy, 79.0% auto-routing rate, and 48.0% reassignment reduction on 7,976 unseen tickets; deployed via Gradio at 164 ms latency.

Campus Placement Prediction System (CPPS) ([LINK](#))

Tech: Python, Sentence-BERT, KeyBERT, spaCy, Gradio, PyMuPDF

- Built a JD-adaptive resume screening framework that converts a resume and target JD into a transparent placement score, ranked skill gaps, and quantified improvement suggestions.
- Engineered a 7-stage pipeline covering resume parsing, JD bucketing (required / preferred / optional), five-tier hybrid skill matching, six-component scoring, and improvement simulation.
- Implemented semantic matching using SBERT, KeyBERT, and spaCy POS filtering; deployed a Gradio app with 3–5 second CPU inference and a demonstrated 52.99% → 81.81% projected uplift.

VERA — Verifying Remedies Assertion ([LINK](#))

Tech: Python, Pandas, Scikit-learn, NLP, Matplotlib, Gradio

- Engineered an NLP preprocessing pipeline using Pandas and Scikit-learn (TF-IDF) to transform unstructured health claims into a classification-ready format.
- Benchmarked SVM, Logistic Regression, and Random Forest classifiers to identify the optimal model for detecting health misinformation.
- Achieved 96.1% accuracy and 99.3% AUC with the final SVM model.

CERTIFICATIONS

- Python for Data Science, AI & Development (IBM)
- Databases and SQL for Data Science with Python (IBM)
- AI Foundations for Everyone (IBM)
- Machine Learning for All (University of London)
- Cloud Computing Essentials with Azure Management (Microsoft)
