Profile Summary

Motivated MCA student with strong foundations in software development, machine learning, and web technologies. Skilled in Java, Python, and SQL, with hands-on experience in building full-stack applications and AI-based systems. Experienced in developing REST APIs and deploying applications on cloud platforms. Seeking entry-level IT roles to apply problem-solving skills and contribute to real-world solutions.

Education

MCA – Master of Computer Applications Jain University, Bangalore, India CGPA: 7.4	Aug 2024 – Present
B.Sc – Information Technology Kongu Arts and Science College, Tamilnadu, India CGPA: 7.5	Jun 2021 – May 2024

Technical Skills

Programming: Java, Python, C, C++
Web Technologies: HTML, CSS, JavaScript, PHP
Databases: MySQL, MongoDB, SQL
Machine Learning: Supervised & Unsupervised Learning, Classification, Regression, TF-IDF, Cosine Similarity
Libraries & Frameworks: Pandas, NumPy, Scikit-learn, Flask
Tools & Platforms: Git, GitHub, AWS (Basics), Render, VS Code
Core Concepts: Data Structures, OOP, REST APIs, Multithreading
Data Tools: Excel, Power BI

Internship Experience

Java Programming Intern CODTECH IT Solutions Pvt. Ltd	Feb 2025 – Aug 2025
- Developed Java-based file handling utilities for efficient data processing - Built a REST API client to fetch and display structured data - Designed a multithreaded client-server chat application using Java sockets - Implemented a recommendation system using Apache Mahout	

Projects

Smart SkillSync AI – Intelligent Skill Matching System

GitHub: github.com/vickyb03/Smart-SkillSync-AI

- Developed a full-stack application using Python (Flask backend) and web technologies (HTML, CSS, JavaScript)
- Implemented machine learning using TF-IDF vectorization and cosine similarity for skill matching
- Built REST APIs for real-time data processing and result generation
- Designed interactive UI including login, dashboard, and skill analysis pages
- Deployed the application on Render for live access
- Utilized Python libraries such as Pandas, NumPy, and Scikit-learn

Campus Placement Prediction System

- Built a machine learning model using Python and SQL (MySQL) to predict student placement outcomes
- Achieved 80% accuracy using classification techniques
- Performed data preprocessing, feature selection, and model evaluation

Certifications

- Python for Data Science, AI & Development – IBM | Aug 2025
- AWS Cloud Practitioner Essentials – Amazon Web Services | Aug 2025
- Advanced Database Management System – Jain Group of Institutions | Feb 2025
- Introduction to Artificial Intelligence (AI) – IBM | Feb 2025
