PROFESSIONAL SUMMARY

A versatile full-stack developer and generalist with a “get-it-done” mindset, continuously evolving across software engineering, cybersecurity, and AI/ML. Known for crafting clean, scalable, and secure solutions to complex problems, with a strong focus on performance and user experience. Excels in collaborative environments and consistently delivers high-impact, real-world applications that bridge innovation with reliability.

EDUCATION

Master of Computer Applications (MCA- Information Security Management Systems)

Jain Deemed-to-be University, Bengaluru

SKILLS

- **Software Engineering:** React.js | TypeScript | JavaScript | Node.js | Express.js | Python | SQL (MySQL, PostgreSQL) | NoSQL (MongoDB, Firebase) | Flutter (cross-platform apps) | RESTful APIs | Git/GitHub
- **Cybersecurity:** SOC Monitoring | Threat Detection | Incident Response | OSINT Automation (Python + APIs) | Linux CLI | Vulnerability Scanning | Secure Coding | Splunk | Wireshark | SIEM | Burp Suite
- **AI/ML & Automation:** AI development using React, TypeScript & APIs | Prompt Engineering & Fine-Tuning | Python for automation, data processing & security tooling
- **Soft Skills:** Problem-Solving & Critical Thinking | Adaptability & Continuous Learning | Collaboration & Teamwork | Clear Communication | Attention to Detail | Leadership & Initiative

CERTIFICATES & COURSES

- **CompTIA Security+ (In Progress)**
- **[Certified In Cybersecurity](#) by [ISC2](#)**
- **[Google Cybersecurity Professional](#)**

EXPERIENTIAL LEARNING

Novagate Solutions | Internship | Title: AI Software Engineer Intern

1/10/2025 - Current

Working on developing and integrating **AI-powered systems** using **machine learning models**, focusing on **automation**, **performance optimization**, and **secure system design**.

SS Technologies | Internship | Title: Front-End Dev

1/10/2023 - 1/12/2023

In my SS Tech front-end journey, I've thrived in a dynamic environment, enhancing my UI development skills. Proficient in Figma design and React, I seamlessly translate creative concepts into practical solutions. Collaborating within a forward thinking team has deepened my appreciation for the synergy between design and development.

PROJECTS

- **Live Web Portfolio** | [Link](#)
Reactjs, Typescript, Bootstrap, Vite
Built a personal web portfolio using Vite, React, and TypeScript, showcasing projects, skills, and certifications. Optimized for performance with lazy loading, responsive design, and deployed via GitHub Pages with CI/CD.
- **Visitor Management System (Cybersecurity SaaS) | Ongoing | 2025**
React, Node, Firebase
Developed a multi-tenant, role-based visitor management system with React & Firebase, featuring secure passkey verification and real-time tracking. Applied DevSecOps practices to ensure scalability and resilience.
- **P2P Based Secure File Transfer System** | [Link](#)
React, Node, WEB RTC
Built a **P2P-based Secure File Transfer System** using **React, Node.js, and WebRTC**, enabling encrypted, real-time file sharing without central servers.
- **AI-Powered Personal Assistant**
React, Node, Groq, AI/ML
Built a **personal AI assistant** using the **Groq API** and **custom fine-tuning**, enabling intelligent, real-time responses and task automation with optimized performance.
